Subject: RE: Pillon property

Jeff:

There is another location noted in a site assessment report compiled by Seattle-King County Public Health (October 29, 2014): "A seasonal ditch with runoff runs along the western edge of the site, where it is released into the adjacent parcels to the north at the Park (May Valley Park-Parcel No. 022305-9097 and adjacent residential parcel (Parcel No. 00230-9043)." The outfall would be located at the far northwest corner of the property- see figure below.

I can also see if there is surface water for a background sample in the May Valley Park (owned by King County). A background soil sample could also be collected there.

Thanks-Jim

Thanks, everyone. This helps us a lot. If anyone on this thread feels like they wish locations had been added/deleted /changed, we are totally open to that consideration.

Thanks to you all.

Hi Jim and Jeff,

We will work on getting you the information collected by Ecology asap.

Thank you,
Tom

Subject: Pillon property

Hi, James. I'm pleased to report that our contractors have received their task orders and are now fully able to begin planning and preparing in earnest for our November 12 mobilization. I have copied Steve Hall and Seth Wing from ENE on this email. I told them in the kickoff meeting this morning that I was going to connect them with you for coordination with certain aspects of the investigation we are undertaking at Pillon.

EPA has agreed to conduct a round of surface water sampling during our removal action. Ecology and/or King County conducted surface water sampling during the 2016 field investigation. Do you have or do you know where we can obtain a copy of the report for that event? In particular, we are looking for the locations from where the samples were collected. I assume Ecology or KC put some effort into the strategy they used to determine where to collect those samples and that would help us get our planning done. Also, if you have any suggestions regarding additional or

better sampling locations, that would be very helpful.

Thanks, James. Any help you can give will allow us to be better prepared when we finally get site access and mobilize.
